Sample **Zkittles 8**

Sample ID SD230606-048 (76785)	Matrix Flower (Inhalable Cannabis Good)
Sampled -	Received Jun 06, 2023
Analyses executed CAN+, MWA	Reported Jun 07, 2023

Laboratory note: The estimated concentration of the unknown peak in the sample is 0.31%. Currently, PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated OB products) from which we believe to be either (+)-8-THC or d9-THC. At this time there are no reference standards available for (+)-8-THC. (+)-8-THC is a different compound from the main (-)-8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-8-THC and d9-THC with the majority, if not all, of the concentration being (+)-8-THC. Total (+)-(-) 8-THC concentration is estimated to be 14.42%.
